ABOUT SSC

Sanctum Startup College was born out of necessity, at a time, in an environment where the need for entrepreneurial education was overwhelmingly apparent. Our goal is to catch them young. The plan therefore is to embed entrepreneurial activities into the high school curriculum.

“ They grow from secondary school students to young entrepreneurs by the time they leave us. That is why we are a Startup College. We instill the entrepreneurial spirit and a start up capability in every child ”

HOW TO APPLY

Application forms can be purchased in two ways:

At the school premises (Sanctum Startup College, Lagos) or visit our website: www.startupcollege.com.ng to download a copy of the form.

Submit the filled form with your bank teller of **₦7,500 (Seven Thousand Five Hundred Naira Only)** at the exam centre.

- Strong spiritual emphasis
- Opportunities to participate in an Annual International UK Summer Camps/Student Exchange Programmes

OUR TEACHING PHILOSOPHY-FLIPPED CLASSROOM

The Flipped Classroom System draws on concepts such as active learning, children engagement and interactive course design, and course podcasting. During class sessions, teachers function as coaches, mentors and advisors, encouraging children in individual development and team work.

The Flipped Classroom also caters to children with learning disabilities

Imaging the level of learning!

This is in direct contrast with the traditional model of classroom instruction, where the teacher is typically the central focus, sharing information during the classroom session. The teacher responds to questions while students defer directly to the teacher for guidance and feedback.

Students often try to capture what is being said at the instant the speaker says it. This makes it impossible for the student to find the space for reflecting on and digesting the knowledge being shared. Extending the knowledge to other frontiers is also impossible with this system. So, instead of knowledge being extended from generation to generation, it ends up being degraded.

The flipped Classroom system draws on concepts such as: **active learning, children engagement and interactive course design and course podcasting.** During class sessions, teachers functions as coaches, mentors and advisors, encouraging children in individual development and team work. **The Flipped classroom also cater to the children with disabilities in learning.**

ADMISSION INTO JSS 1 (2018/2019) IS ON! MAY 26 & JULY 28
